★ **MADE** in the **USA** ★

EmberGlo® Gas Broilers Cook with Extreme Radiant Heat!

Now you can enjoy the flavor of outdoor charbroiling —indoors! EmberGlo's eye-catching glowing hearth will reach a temperature over 1600° searing your meats yet preserving the natural flavor. With our unique FLARETROL® system, you have perfect control to keep flare ups where they belong—low and concentrated for best cooking results.

Flaretrol® System

Unmatchable Outdoor flavor with indoor ease—EmberGlo®

EmberGlo's design has made open hearth broiling practical, economical and profitable for every type of food service operation. Our special in shot gas burners supply broiling heat to a durable ceramic hearth. The BARBRIQ transmit searing radiant heat to the meat utilizing its natural juices and creating more natural fuel. Burner jets are located along the sides of the recessed hearth instead of below it. This design helps prevent the jets from becoming clogged with dripping grease, ashes, soot or food particles.

Open Hearth Open Front

41F	35 7/8"w X 31 1/8"d X 41"h						490 lbs

Experienced chefs know that it is the radiant heat, not the flame, that cooks food and seals in flavor. Controlled radiant heat, applied properly, is the key to perfectly broiled, mouth-watering dishes. Our exclusive FLARETROL® system is the most effective means of flare up control for open hearth broiling. When flames are leaping too high, a simple flip of the switch activates the FLARETROL® system. A focused stream of air blows across the glowing briquettes, harnessing the flames back to a safe level, while giving back complete control for a consistent unsurpassed broiling technique.

- Floor and counter models have identical features within the model series - the "C" stands for Counter and the "F" stands for Floor
- * Kabob broilers come with a set of stainless steel skewers and the grill grate is optional
- Specify natural or propane gas when ordering
